

UNIFLEX SHELTERS

EMERGENCY RESPONSE SHELTER – FABRIC END-WALL

SETS-UP IN MINUTES

UniFlex ERF Shelter with shower facilities.

The self supporting UniFlex ERF structures are easy to set-up, making them an ideal solution to the universal need for fast, fully enclosed portable shelters.

Our unique accordion folded shelter is constructed from high density polypropylene tunnels with integral vintex fabric end walls, including built-in zippered windows and doors. Interior dividing walls can be added, even showers.

UNIFLEX SHELTERS

The unique Pine Valley Uniflex Shelter constructed from polypropylene tunnels with integrated fabric end walls, including built-in zippered windows and doors, offers the following important advantages:

Transportation:

The Uniflex Shelter offers an incredible 50:1 ratio from the erected to the collapsed state; making it cost effective to transport large quantities of complete shelter kits by land, sea, or air. Up to 200 shelters can be packed into a standard sea going container.

Time:

The unique Concertina Uniflex Shelter design can be fully erected in less than a minute.

Sizes:

10 distinct sizes to choose from; ranging in size from 100 sq. ft. to 220 sq. ft. of usable floor space. A collapsed 10x14 pre-assembled "Uniflex" Shelter takes up 36 cubic feet of space- 6'x6'x1

Privacy & Comfort:

The opaque white polypropylene or polycarbonate outer-shell provides the occupants with the maximum privacy and reflects the sun's rays; keeping the shelter interior relatively cool on the hottest of days.

No Assembly:

No on-site assembly required. In seconds the Uniflex ERF Shelter forms into a ready to use structural building complete with roof, sidewalls, end walls complete with integral floor.

Affordability:

Compare cost per sq. foot of installed space. Consider the ease of setup and there is no comparison. The Uniflex Shelter gives you the most for the least.
